TPC 24 Drill

From 7 yards fire 3 strings of 8 shots. The start position is in the compressed imminent threat position which is at your chin level with 2 hands away from your chin. On the start signal bring gun up to target and fire 8 shots within the gray bar. You repeat this for 2 more strings. You will score this by Hit Factor. Hit Factor is when you divide the points by the time. Every hit inside the gray bar is 5 points and every hit outside the gray bar is no points. Add up all your points and all your time. Divide the points by the time and that will be your score.
